SUMMARY OF INFORMATION

During the session, I first could see impressions of two water fountains. Water was not coming out of the fountains. I could also see a Buddha type statue with an eye. I felt that I was in a city within a city.

I then felt that I was out of the city and I could see two large light brown rocks. There was a highway in front of the rocks with a red car driving on the highway. This was the only car on the road. Below the highway was grass and shrubs.

The word "limousines" phonetically surfaced.

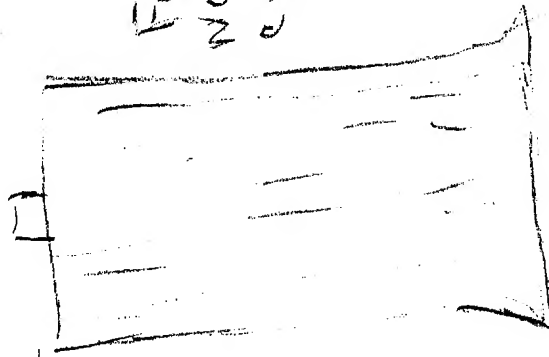

I then could see people at the site. It looked as though people were reaching up or climbing up a natural wall. I could see a man in a robe with his arms extended out. He was standing on large rock. It looked as though he was either preaching or singing. He was standing in an elevated position. It seemed as though the site was a natural setting where people come to see something or do something. The site may be an outside temple.

It was warm and breezy at the site. It was vast and spacious. There was also a man made bridge at the site.
